Executive Commissioner Marchant Believes More Than 12,000 Citizens of Oklahoma Will Take Part.

Executive Commissioner Edgar B. Marchant is now working upon the arrangements for an entire week at the Louisiana Purchase Exposition, every day of which there will be a celebration by some Oklahoma city.

It is planned that the week will begin with Oklahoma Territory Day, Monday, September 5, and Oklahoma City Day on Tuesday, both of which events have been officially recognized by the Exposition authorities, and are a certainty. Commissioner Marchant is of the opinion that there are other live cities in Oklahoma that would desire to have a day set apart to them, and thus the week of September 5 will be made one continuous round of pleasure for Oklahomans.

Mr. Marchant states that advice from the Territory are that there is much interest in the observance of Oklahoma Day at the fair, and he estimates that fully 12,000 citizens of the Territory will be here during the week. INDIAN LESSON IN HONESTY.

Vancouver Tribes Surprised by "Talking Qualities" of the Americans.

Since their arrival at the World's Fair the Kwakiut and Yakima Indians from Vancouver Island have become very exclusive and have asked Doctor Simms for permission to build a fence around their reservation. The reason for this request was explained by stating that visitors at their camp seem to think that the baskets, wood, carvings and other articles which these people make are souvenirs, only they take them without even asking permission.

Doctor Simms says that honesty among these people is practiced to the point where even articles which have little or no value from another in very rare cases are left on tables or benches in their homes, the door or entrance being left open, and visitors are free to take what they please.

These people have expressed great surprise at the honesty of Americans in taking what does not belong to them, and wonder that they are not taken advantage of. They are ready to pay for such an offense among them is that the guilty party shall be placated, and the offender shall be the center of the camp and kept there until every inhabitant, even the small children, have seen him and he is never again recognized by anyone.

LIFE IN THE DEEP SHOWS.

One of the Features in "Under and Over the Sea."

The possibilities obtainable through the agency of electricity are nowhere so fully demonstrated as in the production of "Under and Over the Sea," on the Pike. So realistic is the atmosphere of submarine and aerial navigation, the spectators or passengers on the queer craft almost live for the time being in the depths of the deep or on the surface of the sea. Life in the deep sea is seen in a thousand forms, vegetation and bulks of the deep or on the surface of the sea. The submarine craft is only ended after passing up the River Seine to Paris. Here the craft is seen in the city of the future, and the audience is taken through the principal thoroughfares of the French capital, then ascending to the Eiffel tower in an aerial elevator and embarking on the huge airship, flying far above the earth over the cities of France, Germany and England across the ocean to New York, the flight continues above the cities of the East. Finally the city of St. Louis appears before you.
